13 January 2020

Dear Sixth Form Biologists and Parents,

On 23 January 2020 we have an exciting opportunity for our A-level Biologists to attend a Lecture by Dr Alexandra Woodacre, a Microbiologist from the University of Northampton. The title of the lecture is 'Revealing the invisible: How microscopic life has a big impact'. This will give students a taste of what university lectures are like and help to broaden their knowledge beyond the A-level specification.

Refreshments will be provided for all students attending and there will be no cost for the trip. We do ask however, that you complete the form below to acknowledge that your child will be able to attend. We will travel by school minibus to Northampton Academy departing at 2:45pm and returning to school by 5:20pm.

Yours Sincerely,

Anna Cowling

Biology Department

Child's name:

My child

- is able to attend
 is NOT able to attend
